EDUCATION

University of Texas at Dallas   **Aug 2021 - May 2024**
Bachelor of Science, Computer Science

EXPERIENCE

Strategic Auto Group   **Jan 2023 - Present**
Web Developer & Consultant   *Garland, Texas*
- Engineered a custom dealership web application using JavaScript, HTML, and CSS to automate vehicle browsing and inventory management.
- Implemented responsive web design using CSS media queries and Flexbox, ensuring high-performance cross-device compatibility and faster page loads
- Enhanced online visibility and lead generation by delivering a modern, SEO-optimized, customer-focused web experience.

eBay   **Jan 2019 - Present**
E-commerce Business Owner
- Directed business operations for a high-volume eBay storefront, using Python scripts and MongoDB to track sales, which sustained five years of consistent growth
- Implemented pricing strategies and market trend analysis with Python and Palantir Foundry, which increased inventory turnover and improved profit margins
- Managed complex logistics, performing inventory audits with SQL queries and resolving customer conflicts via RESTful API support, maintaining a 99%+ positive feedback rating

Genpact   **Jan 2021 - Jan 2022**
Quality Analyst   *Richardson, Texas*
- Performed rigorous quality assurance and data validation on large-scale datasets to ensure accuracy and regulatory compliance.
- Identified and resolved critical data discrepancies, significantly improving overall data reliability for the client.
- Collaborated with cross-functional teams using Git and Agile workflows to meet strict deadlines on NDA-protected projects, delivering the final product on schedule and meeting client expectations

CVS Pharmacy   **Jan 2019 - Jan 2021**
Pharmacy Technician   *Wylie, Texas*
- Managed data entry using pharmacy management software and fulfilled medication orders, ensuring full regulatory compliance and reducing order-processing errors
- Collaborated with physicians and pharmacists through the electronic health record system to process high-volume daily prescriptions, streamlining workflow and decreasing patient wait times

TECHNICAL PROJECTS

Data Visualization Application
Palantir Foundry
- Developed automated data pipelines and interactive dashboards that improved decision-making efficiency by 40%

Personal Fitness Tracker
Full-Stack Web App
- Built a full-stack application using JavaScript to log workouts, calorie intake, and body-weight metrics.
- Implemented full CRUD functionality and progress visualization tools, contributing to a 15-lb personal health goal
